wow the hint bottom is sooooo beautiful, I like the idea about the recharge is soo pretty. In the secret order3 sara has travel back to destory the mask. But the boat that use to travel to difference time was broken I am expecting to see how she fixed the boat and go back home in order 4. Not bad, but too short , aint worth the price.. TLDR; I love basketball and manager games, this one is so bad that I'd rather keep playing football/soccer managers or really do anything else than deal with this rather Early access product.

I really want to like this game. I really do. So much that I ignored the "mixed" reviews. I love sports management simulations and would love to have a good basketball one.

This one isn't it, sadly. It seems rushed and half done, more like an early access title. It is:

- crashes constantly (~ 1 crash per hour for me, hope you saved!)
- absolutely lacking documentation, the "manual" is a joke, couldn't even find what skills influence exactly what
- riddled with bugs (for example you can hire the same scout twice, he will show up twice, salary deducted twice, but he can only ever be on one mission)
- lots of unpolishedness that with tiem drives you crazy (select sorting, go to player page, go back, sorting gone :())
- missing features (or things I can't find in the game or the manual) - hey you are scouting this player, oh you realized after an update he is not for you - there is NO WAY (that I can find) to abort scouting that player so hey continue wasting resources on them
- Game gets ridiculously slow at times, e.g. if I played a game, simulated till end and afterwards want to simulate the schedule. At one time it just stopped after minutes. An no I haven't selected too many leagues, restart and reload the game and everything happens in seconds again (some sort of leak I guess)

That are just a few of the things. You can also find a "
" text in a fairly prominent text (HTML for line break, seems to have not been correctly converted). This hints to the amount of quality assurance this apparently went through.

Stay away.. Apparently focused on a very young user group.

Didnt like it ATAL. This is a flat field card file data base with a few whizz bang features giving a nice graphical front end. In all fairness the description of the software does not say it is anything else. However, there are a lot of free databases on the market, and this brings nothing new to the table apart from the flashy front end.

I am not disappointed with my purchase, but I think the software needs work before the price can be Justified.

I tried to contact the company who produce this software in order to report a Cut and paste bug. The E-mail was returned with the message that the recipient E-mail box was full. I guess this is an indication of the type of support that we can expect with this product.

So, in summing up, O.K. for a bit of fun, but I cannot recommend it as a serious database.. Bought it on sale. Worth it.

This is possibly the best\straightest port\remake\remaster I have ever played. It is 100% the original game with a new skin. Don't like any of the changes? They can all be reverted back to the original. That said, if you are looking for much in the way of updates, there are very few.

If you are a fan of the original, it is unlikely you will be disappointed.. Great game. One of my favorites in VR. Very clever and immersive gameplay. This game doesn't give me motion sickness even in the "follow" mode where you're flying behind the duck which I use quite often.

click the trigger to teleport to the duck and hold it to follow works very well . You find yourself teleported to some wonderful vantage points. Speaking of which the graphics are gorgeous but a bit performance heavy.

The game is very immersive in VR. Definite keeper.

. Well game is fun but when those cracks and walls kill me after playing 30 min. it makes me brake my pc. i rather delete game :D. DevochkaQuest's presentation is fantastic, with childish art and low-key music, and a lot of very cute animation. The puzzles are very simple, and usually just require you to click on everything clickable.

The description says the game is short, and that might actually be an understatement. The whole game can be completed in under 10 minutes.

Also, despite its minuscule runtime the experience is very buggy and unpolished. There isn't even a title screen, and settings are adjusted via an external utility.

Overall, I still feel DevochkaQuest (or GirlQuest) is a wonderful little gem of a game - a piece of childhood nostalgia and New Year magic.. My thoughts are a little mixed with this, but I'll give it the recommendation due to the challenge. The swine was the roughest out of all the enemies to surpass, but I did follow through with studying the enemies and made easy progress. I do advise laying around some first aid items in case mistakes are made avoiding the enemies. If this had a level selection button on the main menu, then I would say that this would be worth the replay value. ABSOLUTELY adore the sequence after surpassing the wheelchair swine! Would love to see another battle like that in future projects!

<https://www.youtube.com/watch?v=mpoO8Odu1rQ>. Horizontal shoot-em-up with about a dozen platform levels spanning four stages plus unlockable difficulties and challenges. You have a single-target beam and a multi-target arc beam at your disposal. can choose which to power up with drops and switch between them. and the direction you're facing. with the press of a button.

The only problem with the game is that the maneuverability and inertia are quite poor and really affect your performance. A decent game otherwise, with learning to use both beam types at the right time being essential to progress and survive. Leaderboards for pretty much everything and the game looks great. Doubt I would buy it again if given the chance though due to the terrible piloting.. Pretty bad technical quality. The resolution is horrible, the interface is not great.. Love this game. i just have one major issue with the contols.

Holding down the triggers to hold an items. really need to utilize grip buttons

The issue with this is you cant aim properly and really have to bend your wrist in a silly position to aim and after a minute you start to loose your grip.
